Projects

Beverage Management

Beverage Management System

A software application developed to manage beverage orders and inventory efficiently. The system reduces customer waiting time, avoids rush during peak hours, and improves shop workflow. It supports order processing, stock management, and role-based access control for staff.

Technologies used: PHP, HTML, Node.js

Apartment visitors system

Apartment Visitor Management System

A web-based application developed to manage and track visitor entry and exit in an apartment complex. The system records visitor details, visit timings, and resident approvals to enhance security and reduce manual record keeping. It supports admin and user roles for efficient monitoring and control.

Technologies used: Python, Django, SQL, HTML, nodejs
